Summer Means An Intelligent Solar System

Always Natural

For over 30 Years, SUMMER has been providing carbon and energy savings in Hot Water Technologies to the World.

Well before the current 'trend' to save energy, SUMMER Solar Hot Water System was developed from a focused effort to **Save Electricity and Gas.**

The SUMMER System is manufactured from **100% Recyclable Materials.** Just a small SUMMER Contribution to our Planet.

Always Prudent

The average household uses **approx 1000 kWh** of energy per year for hot water. This equates to 15% of your electricity bill, which goes up to 30% if you require space heating. SUMMER saves you **Up To 95%** of this amount.

This means your investment in SUMMER pays you back within **3 years.**

Did You Know?

There are two types of solar systems:

Solar PV for electricity and
Solar Thermal for water heating.

Solar PV Electricity Generation is typically only **10-20%** efficient and costs a bomb. This equates to approx. USD 7.50 / kWh. Compare to your standard tariff, that's a **75 x Difference.**

“ At the end of my day I want a hot shower. I want comfort for my wife and kids and for them to have hot water without fuss. SUMMER was installed hassle-free and has provided us with free hot water for the last 15 years. After-sales is excellent, SUMMER reps regularly call to check if we have any problems. So far, no problems. Well done. ”

Dr Abdullah, Heart Surgeon

Always Excellent

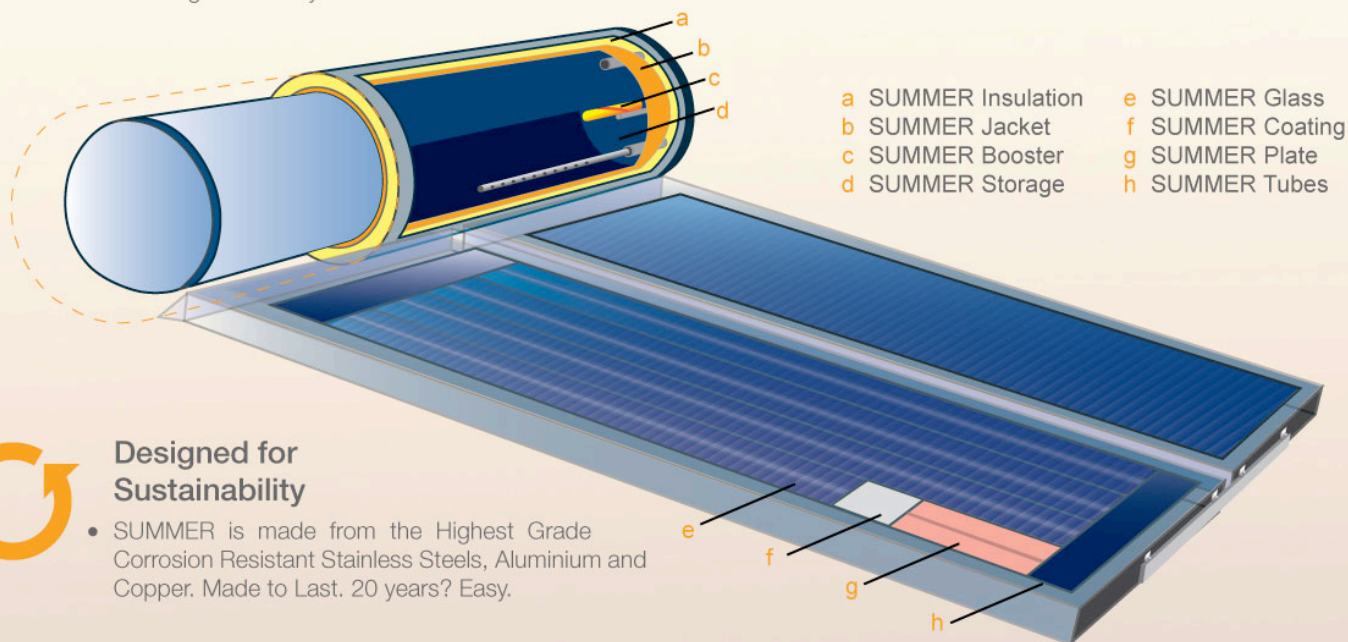

Sterling Reliability

- Only the Highest Quality Brass Fittings and Parts makes it through SUMMER's stringent Quality Control process.
- Special Prismatic Low Iron Tempered SUMMER Glass increases Absorption Efficiency whilst ensuring user safety at all times.

Customized Hot Water

- Our SUMMER Hot Water Systems range from 180ℓ to 450ℓ and can be scaled for your specific needs. 24/7 hot water in your home.

Designed for Sustainability

- SUMMER is made from the Highest Grade Corrosion Resistant Stainless Steels, Aluminium and Copper. Made to Last. 20 years? Easy.

Customer Care (Warranty)

- We have been here for over 30 years and have a wealth of experience in SUMMER Knowledge.
- SUMMER comes with a 10 year Domestic Warranty and a 5 year International Warranty supported by a World-Class Service Team.

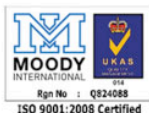

Thoughtless Use

- Zero Moving Parts means Zero Wear and Zero Tear. This means Zero SUMMER Maintenance.

INTERNATIONAL TRUST

Product recognition of trust, confidence and accountability to consumers.

Making the **Right** Move

SUMMER Solar Hot Water Systems have International Tests showing efficiency at over 95% efficiency and very economical.

Always Here

No. **1** in Solar Hot Water Heaters

30 years ago, Pioneering Company SOLARTECH introduced solar water heating to our country. Three decades later, SOLARTECH is still bringing SUMMER to people's hearts and homes.

This is why SUMMER is the Number 1 Solar Hot Water System in the region.

Consistent R&D development has improved SUMMER to the point where it is unrecognizable from what it was only a decade ago. Internationally Recognized by testing bodies worldwide, SUMMER is by far the most Technologically Advanced Solar Hot Water System in our market.

SUMMER Fact

With a long lasting SUMMER lifespan you are looking at approx 5¢ / kWth. That's nearly half the current electricity tariff!
